

Stone encryption wheel

- Cut out both wheels.
- Choose a word you want to encrypt. For example, if you want to encrypt the word "DOOR," place the small wheel on top of the large wheel so that the dark segments align. Find the letter "D" on the large wheel - on the small wheel it becomes "L," and continue the same way for each letter.
- Write the encrypted word "LHHC" in the center of the small wheel, along with a few question marks to keep it mysterious.
- Attach the wheels together at the center, or hide them in separate locations so participants must find both pieces, realize they fit together, and discover how to use them.
